Professional Summary

Technical Game Designer and QA Specialist with hands-on experience developing and testing gameplay systems in Unity using C#. Skilled in combat design, system architecture, playtesting, and debugging, driving the technical implementation for 2D, 3D, and mobile projects. Familiar with gameplay programming, performance optimization, and collaborative development workflows using Git and GitHub.

Technical Skills

Game Engine: Unity (2D/3D)

Programming: C#

Game Design: Gameplay Systems, GDD Documentation, GSB Documentation, Gameplay Balancing, Playtesting, Systems Design

Gameplay Development: Modular Architecture, Procedural Systems, Performance Optimization

Technical QA: Playtesting, Bug Reporting, Functional Testing, Debugging, Regression Testing

Tools: Git, GitHub, ClickUp, Clockify

Projects

Forsaken Rules

Gameplay Programmer | Technical Game Designer *Sep 2025 – Jul 2026*

3D Isometric Roguelike — Published on Steam

- Designed and balanced enemy and boss combat behaviors, creating progressive learning curves aligned with the creative vision.
- Programmed core gameplay mechanics in Unity using C#, fully implementing combat loops, interactive UI, and dynamic inventory.
- Conducted continuous technical QA and playtesting, iterating on game feel, collision precision, and resolving bugs before release.
- Architected modular systems for enemy variants and stat tracking, improving code maintainability.
- Collaborated using Git/GitHub within a multidisciplinary development team.

Eden 404

Gameplay Programmer | Technical Game Designer *Mar 2025 – Jul 2025*

3D First-Person Shooter

- Implemented gameplay mechanics and player interaction systems.
- Solved technical issues affecting gameplay stability and performance.
- Optimized procedural systems to improve runtime efficiency.
- Worked collaboratively using Git/GitHub.

Franklin's Journey

Gameplay Programmer | Technical Game Designer *Sep 2025 – Nov 2025*

2D Bullet Hell (Android)

- Engineered all core gameplay systems in Unity, including dynamic difficulty scaling and procedural level generation.
- Designed and programmed modular hazard behaviors and an interactive, sequenced tutorial system.
- Developed an efficient projectile management system for large-scale bullet spawning.
- Performed functional QA and optimized gameplay performance to ensure a stable Android build.

Education

Game Design and Digital Entertainment

Toulouse Lautrec | 2023 – 2026

Graduation: December 2026

Recognition

Certificate of Contribution

Mayo 2026 | Tourism Care Civil Association

Recognized for contributing gameplay systems to the educational project *"Guardianes del Humedal" Virtual World*.
